

Approved inputs – fertilisers

Companies on this list are certified by Soil Association to produce inputs suitable for use in organic farming according to Soil Association organic standards and regulations (EC) 834/2007 and 889/2008.

An organic certified user must keep records which demonstrate a need to use the product as per Soil Association standard 2.5. 1.

Compound fertilisers

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>5F's Fertiliser</i>	Fertile Fibre	01432 853111	Pelleted Fertiliser	General Purpose
<i>All Purpose Garden Fertiliser</i>	Law Fertilisers Ltd	01354 740740	Natural plant extracts and minerals to enrich your soil	Please see company website for more information
<i>Base 10</i>	Western Seeds	01834 861904	Base 10 is a compound fertiliser with analysis 0:10:10 + sulphur and trace elements.	Base 10 can be utilised in all farming/horticultural situations as a soil nutrient replacement – Phosphate, Potash and Sulphur + trace elements.

<i>Complete Pellet</i>	Illex Envirosiences Ltd	01673 885175	Plant derived pelleted slow release fertiliser	A balanced NPK for general use
<i>Fertile Fibre Nutrient Base NB1</i>	Fertile Fibre	01432 853111	Please see company website for more information	For use as a base fertiliser for incorporation with peat or coir in grow-bags and as seed compost
<i>Fertile Fibre Nutrient Base NB5 (Vegan)</i>	Fertile Fibre	01432 853111	Please see company website for more information	For use as a base fertiliser for incorporation with peat or coir in grow-bags and as seed compost
<i>Fertiplus 4-3-3</i>	Ferm-O-Feed B.V.		Compound pelleted fertiliser containing micro and macro nutrients and organic matter	Increases soil microbiological activity, improves soil texture, water-holding capacity and pH.
<i>Greenvale Plant Food</i>	Greenvale Farm Ltd	01325 339971	Pelleted Poultry Manure containing N,P &K, calcium and trace elements	Widely used on many crops and vegetables as a multi-purpose feed and soil conditioner
<i>Grochar + 5-5-5</i>	Law Fertilisers Ltd	01354 740740	Proven soil amendment technology to give better rooting and stronger plants	Apply in the seedbed before planting or early in the year for trees or grass
<i>Natural 2</i>	Soil Fertility Dunns	01292 611622	A balanced fertiliser containing phosmin and sulphate of potash. (0-18-17) + 29% CaO + 15%SO3)	General purpose fertiliser for grass and cropping systems

<i>Natural 3</i>	Soil Fertility Dunns	01292 611622	(0-13-26 + 21 CaO + 23% SO ₃)	Suitable for high yielding crops such as winter wheat or grass silage. Ideal for fields that re low for potash and moderate for phosphate.
<i>Organomex Suspension Fertiliser</i>	Omex Agriculture Limited	01553 816016	Tailor-made contract applied soil fertiliser	Pre-cropping soil application of P & K by contractor
<i>Soft Fruit & Tomato Fertiliser</i>	Law Fertilisers Ltd	01354 740740	Garden pack of 3kg for home production of fruit and tomato	Apply before planting where the nitrogen and macronutrients will ensure good fruiting
<i>Solufeed NPK 4:4:4 + 2% MgO</i>	Solufeed	01243 554090	Ideal for herbs and slow growing plants	Please see company website for more information
<i>Solufeed NPK 7:7:10</i>	Solufeed	01243 554090	Ideal for peat-based products and as a general fertiliser	To be mixed with peat based potting composts

Liquid fertilisers

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Bioelements Organic Fertilizing Liquid - Compost Extract</i>	Bioelements Ltd	07588 332370	High in fulvic acids, contains organic forms of plant nutrients.	Crop nutrition – apply to leaves, roots, seeds and to the soil.
<i>Biovin Liquid</i>	Plant Health Cure	0031 13 7200 300	A high-energy extract of humidified grape skins, stems and seeds. Contains natural and effective growth hormones and plant nutrients.	Phytonutrients stimulate the systemic immune systems of plants and support healthy plant growth.
Botri'	Itaka	07437 584661	Botri' provides a nutrient source favourable to the development of beneficial micro-organisms	Foliar application
<i>Cover</i>	Itaka	07437 584661	Cover is a suspension formulation containing copper and sulphur	Foliar application
<i>Fruit Natural G</i>	Itaka	07437 584661	Fruit Natural G protects plants from climatic stress and improves flowering and fruit set	General purpose liquid fertiliser

<i>Giotto N5 V</i>	Itaka	07437 584661	Giotto 5N V provides nitrogen, other essential elements and vegetal extracts to reduce the sensitivity of plants to thermal stress, salinity and drought	General purpose liquid fertiliser
<i>Italeaf Equo V</i>	Itaka	07437 584661	The product provides vegetal amino acids and the essential elements N, P and K, essential for healthy nutritional metabolism in plants	General purpose liquid fertiliser
<i>L-CBF Terra Fed™</i>	QLF Agronomy	01952 727754	A liquid source of quality plant nutrients combined with an excellent carbon source	Helps to stimulate soil biology and vigorous plant root growth whilst providing efficient nutrient utilisation of N-P-K
<i>Maxicrop Natural Fertiliser</i>	Maxicrop	08700 115117	Liquid fertiliser blend of seaweed and plant extracts. NPK analysis of 5:2:5. Available in 10 litre and bulk packs.	Supplementary feed for soil or foliar application. Suitable for a wide range of crop types to enhance growth and yields.
<i>Maxicrop Natural Fertiliser - "Organic Garden" All Purpose</i>	Maxicrop	08700 115117	All-purpose liquid fertiliser containing a blend of seaweed and plant extracts. NPK analysis of 5:2:5	Provides balanced, healthy nutrition for all plants and produces bumper crops of fruit and vegetables. Apply as a soil drench.

<i>Maxicrop Natural Fertiliser "Organic Flower & Houseplant"</i>	Maxicrop	08700 115117	Liquid fertiliser containing seaweed and plant extracts. NPK analysis of 4:2:6	Formulated to provide a higher potash feed, for top quality flowers and healthy plants.
<i>Maxicrop Natural Fertiliser- "Organic Lawn"</i>	Maxicrop	08700 115117	Liquid fertiliser containing seaweed and plant extracts, formulated for use on lawns. NPK analysis of 6:2:4	Provides balanced nutrition for use on all types of lawns, to help produce healthy growth.
<i>Maxicrop Natural Fertiliser- "Organic Tomato"</i>	Maxicrop	08700 115117	Liquid fertiliser containing seaweed and plant extracts, formulated with higher level of potash. NPK analysis of 4:2:6	Apply as a soil drench for high yields of quality tomatoes. Also, suitable for other greenhouse crops and flowering plants.
<i>Pharm Organics 4-2-7</i>	Pharm Fertilisers Ltd	0845 8626 333	Contains essential nitrogen, phosphorous and potassium for plant growth. Liquid formulation for efficient application with minimal waste or run-off.	To be used as a general plant fertiliser by drip or foliar application. To be co-applied with existing products or as a stand-alone application.
<i>PHC Organic Plant Feed 4-2-8</i>	Plant Health Cure	0031 13 7200 300	Liquid plant-based fertiliser with high content of trace elements and sugars for healthy and stable plant growth.	Supports healthy soil life and increases abiotic stress tolerance.
<i>PHC Organic Plant Feed 5-2-5</i>	Plant Health Cure	0031 13 7200 300	Liquid plant-based fertiliser with high content of trace elements and sugars for healthy and stable plant growth.	Supports healthy soil life and increases abiotic stress tolerance.

<i>PHC Organic Plant Feed 6-1-2</i>	Plant Health Cure	0031 13 7200 300	Liquid plant-based fertiliser with high content of trace elements and sugars for healthy and stable plant growth.	Supports healthy soil life and increases abiotic stress tolerance.
<i>PHC Organic Plant Feed 7-2-3</i>	Plant Health Cure	0031 13 7200 300	Liquid plant-based fertiliser with high content of trace elements and sugars for healthy and stable plant growth.	Supports healthy soil life and increases abiotic stress tolerance.
<i>OPF 5-2-5</i>	Pharm Fertilisers Ltd	0845 8626 333	Contains essential nitrogen, phosphorous and potassium for plant growth. Liquid formulation for efficient application with minimal waste or run-off.	To be used as a general plant fertiliser by drip or foliar application. To be co-applied with existing products or as a stand-alone application.
<i>Pharm Organics 7-1-2</i>	Pharm Fertilisers Ltd	0845 8626 333	Contains essential nitrogen, phosphorous and potassium for plant growth. Liquid formulation for efficient application with minimal waste or run-off.	To be used as a general plant fertiliser by drip or foliar application. To be co-applied with existing products or as a stand-alone application.
<i>SM3 Seaweed Extract</i>	Chase Organics GB Ltd	01932 253666	Plant growth stimulant to improve crop yield and quality	See Chase Organics for all crop applications
<i>SM6 Concentrated Seaweed Extract</i>	Chase Organics GB Ltd	01932 253666	Plant growth stimulant to improve crop yield and quality	See Chase Organics for all crop applications

<i>Vegetal CU</i>	Itaka	07437 584661	Vegetal extracts, included in the formulation, help to improve the assimilation and transposition of copper within the plant tissue	Foliar application
-------------------	-----------------------	--------------	---	--------------------

Plant stimulants and tonics

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Algaflex</i>	Biotechnica Services Ltd	01780 433010	Concentrated seaweed extract derived from <i>Ascophyllum nodosum</i>	Biofertiliser and plant biostimulant to promote yield and plant health
<i>Algaflex Spray Dried</i>	Biotechnica Services Ltd	01780 433010	Concentrated seaweed extract derived from <i>Ascophyllum nodosum</i>	Biofertiliser and plant biostimulant to promote yield and plant health
<i>Anthyllis™</i>	Solufeed	01243 554090	Contains high levels of allicin, which has anti-bacterial and anti-fungal properties; it has a systemic and prophylactic action	To stimulate the natural ability of plants to resist pests and diseases, and a growth supplement in many crops
<i>Treecare (formerly Tree Wash)</i>	Solufeed	01243 554090	Carefully formulated with high performance garlic extract and other natural plant ingredients	When used in a programme of treatments from early in the season, it promotes healthy trees, clean fruit and free from many pests and diseases

Bugzof (Formerly Garberry 2)	Solufeed	01243 554090	A concentrated high-grade extract of garlic supplemented with other natural plant derived ingredients	A natural plant invigorator that encourages resistance to aphids and spider mites etc.
<i>Calimero</i>	Itaka	07437 584661	Calimero is a natural plant resistance inducer	Foliar application
Folseafeed	QLF Agronomy	01952 727754	All-natural crop stimulant containing 30% seaweed solids	Stimulates the plant's natural response to give bigger yields, contains macro-nutrients and trace elements
Fulvic 25	Plant Health Cure	0031 13 7200 300	Fully natural and soluble chelating agent derived from Dutch drinking water. Contains humic and a high concentration of fulvic substances.	Enhances root and shoot development as well as fertilisation properties. Stimulates soil life, improves mineral uptake to increase plant quality.
<i>Fulvic Bio/Fulvic 25</i>	Solufeed	01243 554090	A natural and sustainable fulvic acid formulation	To rejuvenate tired, denatured and depleted soils in a natural, environmentally benign way.
<i>Fungzof (formerly Garshield)</i>	Solufeed	01243 554090	A concentrated high-grade extract of garlic supplemented with other synergistic natural plant derived ingredients	Promotes vigour and stimulates plants' natural balanced healthy growth and encourages resistance to mildews and botrytis

<i>Garlic</i>	Itaka	07437 584661	Garlic is a natural plant biostimulant, containing Allicin	Foliar application
<i>Genie 500</i>	Solufeed	01243 554090	High quality liquid seaweed	Growth stimulant with a range of applications
<i>Maxicrop Concentrate</i>	Maxicrop	08700 115117	Concentrated liquid seaweed extract containing 24% seaweed solids. Available in 10 litre and 1000 litre packs.	Bio-stimulant for aiding growth processes e.g. rooting, chlorophyll production, stress relief and stimulating beneficial soil microbes, to enhance yields
<i>Maxicrop No.7 Concentrate</i>	Maxicrop	08700 115117	Concentrated liquid seaweed extract for the amenity sports sector. Contains 24% seaweed solids. Available in 10 litre packs.	Stimulates rooting and leaf chlorophyll levels. Helps reduce stress and boosts beneficial soil microbes, to enhance turf growth and presentation.
<i>Maxicrop Original</i>	Maxicrop	08700 115117	The "Original" liquid seaweed extract, containing 8% seaweed solids. Available in 10 litre packs.	Bio-stimulant for aiding growth processes e.g. rooting, chlorophyll production, stress relief and stimulating beneficial soil microbes, to enhance yields
<i>Maxicrop Original Seaweed Extract Plant Growth Stimulant</i>	Maxicrop	08700 115117	A kelp concentrate used to increase crop rooting and vigour	To stimulate rooting and help recover crops under stress
<i>Maxicrop Take Root</i>	Maxicrop	08700 115117	Natural blend of seaweed extracts. Liquid rooting and transplant aid.	Water into the soil to help increase root mass and aid establishment.

<i>Organomex Kelpomex</i>	Omex Agriculture Ltd	01553 816016	A kelp concentrate used to increase crop rooting and vigour	To stimulate rooting and help recover crops under stress
<i>Stimplex</i>	Ilex Envirosiences Ltd	01673 885175	Seaweed-based biostimulant	Stimulates plant growth to overcome stress and improve quality and yield in all crops
<i>Vinecare (formerly Garvine)</i>	Solufeed	01243 554090	A high performance natural garlic extract, rich in selenium and sulphur. Supplied as a concentrated and biodegradable formulation	Stimulates plant growth and vigour, encourages resistance to botrytis and assist thereby promoting healthy vine growth and fruit production

Soil conditioners

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Blovin</i>	Plant Health Cure	0031 13 7200 300	Contains plant nutrients and a great number of beneficial micro-organisms. Based on the remains of the grape pressing process.	Beneficial effect on ecosystem in soil - improves plant growth and harvest quality.

<i>Carbon Gold Grochar</i>	Fertile Fibre	01432 853111	Increases crop growth and yields, improves soil structure and health, enhances water and nutrient retention capacity of soil.	Soil conditioner
<i>Ecothrive Charge</i>	Ecothrive	07949 078207	Unique insect frass based soil enhancer. Increases fertility, stimulates robust plant growth and generates healthy root zone biological activity.	Soil conditioner and biostimulant
<i>Maxicrop Seaweed Meal</i>	Maxicrop	08700 115117	Sustainably produced dried seaweed meal, rich in minerals and trace elements.	Natural soil conditioner to encourage beneficial soil microbes. Aids moisture retention and helps produce humus.
<i>Remin volcanic rock dust</i>	REMIN (Scotland) Ltd	07715 707009	Finely ground Scottish volcanic dust supplying minerals and trace elements. 0.5kg - 5kg / m2. 20kg and 1 tonne bags and bulk	Top dressing
<i>Soil Conditioner</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information

Nitrogen fertilisers

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Laws Foliar N</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information about product	Please see company website for more information about product
<i>Laws High N</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information about product	Please see company website for more information about product
<i>N Max</i>	Ilex Envirosiences Ltd	01673 885175	Liquid Molasses based fertiliser	A very high N based fertiliser for vegetative growth
<i>Nugro 6-2-4</i>	Nutrel Products Ltd	01522 704404	A safe and effective fertiliser, derived from plant protein sources	Easy-to-use, good water solubility and with minimal sedimentation.
<i>OPF Granular 13N</i>	Pharm Fertilisers Ltd	0845 8626 333	Base fertiliser 13-1-2	Product supplies essential nutrients for plant growth
<i>Nugro 7-2-2</i>	Nutrel Products Ltd	01522 704404	High analysis nitrogen liquid preparation, free flowing and disperses readily	Easy-to-use, good water solubility and with minimal sedimentation

<i>Orgamino - N13</i>	Fertiliser Ltd.	07795 233202	Plant-based nitrogen rich fertiliser with additional sulphur content, rich in macro and micro-nutrients. Derived from fermented molasses.	Stimulates vigorous vegetative growth in all crops. Balanced release of nutrients allows fertilisation to last over 6 weeks.
<i>Organomex 6-2-4</i>	Omex Agriculture Ltd	01553 816016	High nitrogen foliar fertiliser	Used in fertigation or as foliar spray when root uptake limited
<i>PHC Granular Plant Feed 11-0-5</i>	Plant Health Cure	0031 13 7200 300	Plant-based fertiliser with substantial levels of natural sugars. A balance between slow and quick released nitrogen elements.	The high level of trace elements and sugars supports a healthy soil life and provides healthy plant growth.
<i>Solufeed NPK 9:3:3</i>	Solufeed	01243 554090	High nitrogen fertiliser	For use in coir and other peat free composts. For use in propagation only.

Phosphate fertilisers

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
Gafsa Basic	Soil Fertility Dunns	01292 611622	0-29.5-0 Ground mineral phosphate containing minerals and trace elements. Steady release powder.	Ideal for grass reseeds and winter cereals.

<i>Laws High P</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information about product	Please see company website for more information about product
<i>Laws High P Plus</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information about product	Please see company website for more information about product
<i>Natural 1</i>	Soil Fertility Dunns	01292 611622	0-22-9 + 36CaO + 8%SO ₃	Ideal for fields that are low in phosphate. Natural 1 contains adequate levels of sulphate of potash for grazing systems.
<i>Phosmin</i>	Soil Fertility Dunns	01292 611622	Granular version of Gafsa Basic	Helps to improve the palatability of grass swards

Potassium fertilisers

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Cumulus NK 5-1-10</i>	Fertile Fibre	01432 853111	N(5) P ₂ O ₅ (1) K ₂ O(10)	Protected and field scale production
<i>Hortisul</i>	K + S UK & Eire Ltd	0800 0322480	Natural soluble form of sulphate of potash for foliar or fertigation use	Foliar or fertigation use for all crops requiring potassium and/or sulphur
<i>K Max</i>	Illex Envirosiences Ltd	01673 885175	Liquid Molasses based fertiliser	A very high K based fertiliser for fruits and flowering crops

<i>Magnesia-Kainit</i>	K + S UK & Eire Ltd	0800 0322480	Natural screened crude potash salt supplying potassium, magnesium, sodium and sulphur	For use in grassland,carrots, beet, asparagus. Super partner for slurry
<i>Meadowsalt</i>	Soil Fertility Dunns	01292 611622	A natural source of potash, sodium, sulphur, boron, iron, calcium & manganese.	Meadowsalt will stimulate your stocks' appetite and reduce wastage in grazed fields.
<i>Natural Extra K</i>	Soil Fertility Dunns	01292 611622	0-10-40 + SO ₃	Ideal for silage systems with very low levels of potash and adequate phosphate levels.
<i>Nugro 4-2-6</i>	Nutrel Products Ltd	01522 704404	A cost-effective high K product, combats potassium deficiency crop limitations	Free-flowing, good water solubility and with minimal sedimentation
<i>Patentkali 'Granular'</i>	K + S UK & Eire Ltd	0800 0322480	Natural granular sulphate of potash with kieserite fertiliser	Granular application to all crops and grass requiring potassium, magnesium and / or sulphur
<i>Polysulphate</i>	Cleveland Potash	01287 640140	Naturally occurring mineral providing sulphur, potassium, magnesium and calcium.	To maintain the fertility of the soil.

<i>Sulphate of Potash (SOP)</i>	K + S UK & Eire Ltd	0800 0322480	Natural granular sulphate of potash fertiliser	Granular application to all crops and grass requiring potassium and sulphur
<i>Sulphate of Potash</i>	Soil Fertility Dunns	01292 611622	0-0-50 + 45%	Suitable for correcting low soil potash indices
<i>Sylvinite</i>	Cleveland Potash	01287 640140	Natural source of potassium and sodium	To correct or maintain the fertility of the soil
<i>Organomex 4-2-6</i>	Omex Agriculture Ltd	01553 816016	A high potash foliar fertiliser	Used in fertigation or as foliar spray when root
<i>Solufeed NPK 6-5-10 + 4% MgO</i>	Solufeed	01243 554090	Balanced feed with added MgO	Used extensively by compost manufacturers
<i>Laws High K</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information about product	Please see company website for more information about product
<i>Potash Plus</i>	Law Fertilisers Ltd	01354 740740	Supplies soluble potassium, sulphur, magnesium and calcium	Ideal to improve yield and disease resistance - apply before flowering

Trace Elements

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Boron</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information
<i>Copper</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information

<i>EPSO Combitop</i>	K + S UK & Eire Ltd	0800 0322480	Natural magnesium sulphate (epsom salts) foliar fertiliser supplying magnesium and sulphur as well as manganese and zinc	Foliar or fertigation use for all crops requiring magnesium and/or sulphur as well as manganese and zinc
<i>EPSO Microtop</i>	K + S UK & Eire Ltd	0800 0322480	Natural magnesium sulphate (epsom salts) foliar fertiliser supplying magnesium and sulphur as well as boron and manganese	Foliar or fertigation use for all crops requiring magnesium and/or sulphur as well as boron and manganese
<i>EPSO Top</i>	K + S UK & Eire Ltd	0800 0322480	Natural magnesium sulphate (epsom salts) foliar fertiliser supplying magnesium and sulphur	Foliar or fertigation use for all crops requiring magnesium and/or sulphur
<i>ESTA Kieserit 'Granular'/'</i>	K + S UK & Eire Ltd	0800 0322480	Natural magnesium sulphate (Kieserite) granular fertiliser supplying magnesium and sulphur	Granular application to all crops and grass requiring magnesium and / or sulphur
<i>Fertibor (25 kg)</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Sodium borate used mainly in compounded formulations	Mainly in ground applications
<i>Granubor</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Granulated sodium borate used mainly in blended formulations.	Mainly in ground applications
<i>Granubor Natur (25 kg)</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Sodium borate used mainly in blended formulations	Mainly in ground applications
<i>Iron</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information

<i>Manganese</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information
<i>Optibor TG Technical Granular</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Granular boric acid	Mainly in ground applications
<i>S-Chelate-O 3 Element System MgMnZn</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - magnesium, manganese, zinc	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O 7 Element System</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O B</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - boron	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O Cu</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - copper	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O Cultiv-8</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O Fe</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - iron	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O M-Squared</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - magnesium, manganese	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O Mg</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - magnesium	Foliar, spray, drip and fertigation use.

<i>S-Chelate-O Mn</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - manganese	Foliar, spray, drip and fertigation use.
<i>S-Chelate-O Zn</i>	Align Chemical Ltd	01494 728458	Highly soluble and bioavailable trace element formulation - zinc	Foliar, spray, drip and fertigation use.
<i>Solubor (25kg)</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Sodium borate powder for dissolution for foliar Applications	Mainly in foliar applications
<i>Solubor DF (2,5,12 & 25 kg)</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Sodium borate powder for dissolution for foliar Applications	Mainly in foliar applications
<i>Solubor Flow (10 litres)</i>	Rio Tinto Minerals (Borax Europe Ltd)	020 7781 2000	Sodium borate (liquid for dispersion) for foliar Applications	Mainly in foliar applications
<i>Zinc</i>	Law Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information

Liming Agents

Product Name	Company Name	Telephone Number (Sales)	Product Description	Product Use
<i>Laws Calcium</i>	Laws Fertilisers Ltd	01354 740740	Please see company website for more information	Please see company website for more information
<i>Lime X Super 70 M</i>	British Sugar PLC	0870 2402314	Precipitated calcium carbonate	Primarily for growing media

<i>Lime X 45</i>	British Sugar PLC	0870 2402314	Precipitated calcium carbonate with integral P, Mg and S. Typically applied via FYM spreader	Primarily for soil pH correction, and supply readily available Ca, plus maintenance P, Mg and S
<i>Lime X 70</i>	British Sugar PLC	0870 2402314	Precipitated calcium carbonate with integral P, Mg and S. Typically applied via a lime spreader	Primarily for soil pH correction, and supply readily available Ca, plus maintenance P, Mg and S
<i>Maxicrop Cal-Sea-Feed</i>	Maxicrop	08700 115117	A blend of dried seaweed and natural calcium compounds for a sustainable alternative to calcified seaweed.	Helps neutralise acid soils, provides minerals and improves soil structure.
