**Landscape to Carbonscape:  
*The roadmap to a soil carbon  
marketplace***

**Agenda**

**14 July 2021 (10am-2pm)**

## Background

Soil carbon sequestration represents a critical tool in the journey to NetZero and the delivery of other ecosystem services. However, there are a number of critical steps required before a functioning market would be possible.

Land managers are already being rewarded for increasing the carbon in their soils, however various economic, scientific, practical and legal issues need to be addressed before a robust, scalable and coherent marketplace can emerge; one that engenders confidence for all stakeholders while delivering for land managers, investors and the environment.

## Objectives

- To understand the UK soil carbon marketplace and stakeholder needs.
- To present the need for a soil carbon code/protocol to facilitate the farmland soil carbon market.
- To identify how stakeholders can contribute to the development of the market.
- Agree concrete next steps.

## Agenda

- 10:00 **Welcome**  
*Liz Bowles (Soil Association)*
- 10:10 **A soil carbon marketplace**  
*Matthew Orman (Sustainable Soils Alliance)*
- 10:25 **The view from the marketplace**  
*Thomas Gent (Gentle Farming), Andrew Voysey (Soil Capital), Rob Reed (Soil Heroes),  
Robert Hall (Federated Hermes), Tom Morton (ClimateCare)*
- 11:25 **Q&A session**
- 12:15 **Lunch**
- 12:45 **A soil carbon code: what will it offer?**  
*Professor Mark Reed (Scottish Rural College)*
- 13:00 **Learning from experience-the Woodland Carbon Code**  
*Vicky West (Woodland Carbon Code)*
- 13:10 **Learning from experience-the international perspective**  
*Robert Parkhurst (Sierra View Solutions)*
- 13:20 **Q&A session**
- 13:45 **Closing remarks**
- 14:00 **Close**
